“WE WERE LOOKING TO IMPLEMENT A SUPERIOR TIME AND BILLING SYSTEM. WE CHOSE RAINMAKER. THE SYSTEM HELPED US IMPROVE CASH FLOW AND PROVIDED US WITH THE REPORTING CAPABILITIES WE WERE LOOKING FOR IN A SYSTEM.”

- Accounting Manager

RainMaker’s Platinum Financial Management is a result of working with hundreds of clients to analyze their needs and to provide a system built specifically for today’s more demanding firms. Firms asked for more than just routine financial management, they wanted advanced features, flexible set-up options and tools to improve productivity and profitability.

RainMaker Platinum improves a firm’s profitability and cash flow by reducing the time it takes to generate complex bills, speeding up client payments, streamlining the cash receipts process and effectively handling the firms’ account receivables. The accounting modules provide the expense controls and reporting necessary to manage the assets and liabilities of the firm.

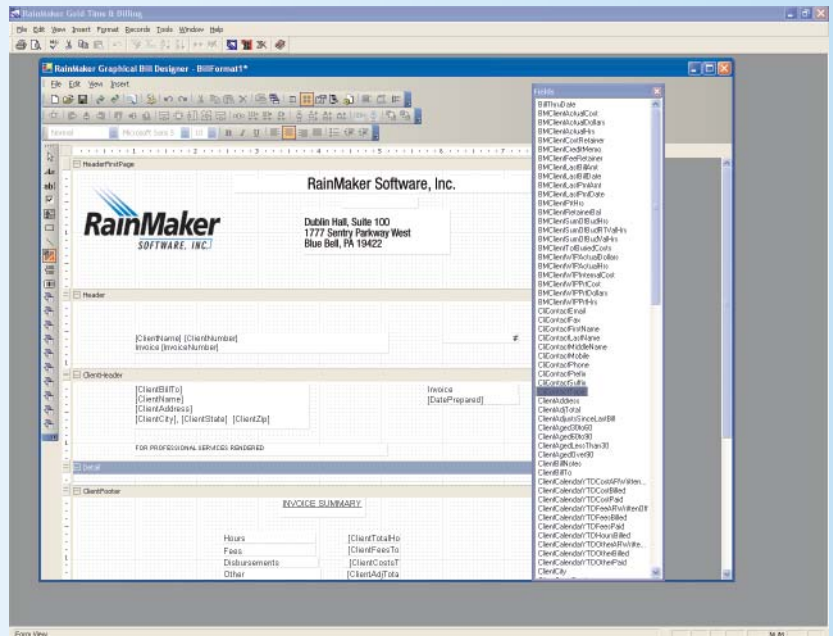

RainMaker’s Time and Billing module will save time and eliminate unnecessary keystrokes. All functions are selected from logical menus or icons so single keystrokes or mouse clicks are all that is required to invoke system functions.

All entry screens contain clear indications of the information required, while on-screen prompts let your users know what steps are required to complete a function. A single keystroke provides on-line look-up features for clients, matters or codes and application screens may be left on the Windows task bar while other functions are performed.

Users will quickly discover the benefits of personalizing their screens with their own short-cut icons that match their use of the system. The firm will save the time of re-keying data into third-party products, because RainMaker Platinum integrates with most industry standard software products including Microsoft® Word, Microsoft® Excel, Microsoft® Outlook and a host of cost capture and document management products.

“We need a way to...”	RainMaker Platinum provided:
Simplify our bill creation process.	Graphic Bill Designer with drag-and-drop bill creation eliminating the need for custom programming.
Track rates so we can better measure profitability.	A way to store and accommodate multiple rate values by timekeeper, client, matter or type of timekeeper. These multiple rate values provide the ability to measure profitability based on cost and realization based on Standard or Negotiated rates.
Generate reports from multiple sources without custom programming and third-party resources.	The ability to create, schedule and email reports in printed, Microsoft Excel or PivotTable formats, without custom programming.

“We need a way to...”	RainMaker Platinum provided:
Easily send copies of expenses directly to clients with billing statements.	Expense Imaging allowing firms to store images of client chargeable invoices and print them as attachments to client bills.
Get complete financial analysis of our clients and matters from various perspectives.	A way to drill down to the lowest level of client/matter information from various perspectives such as billing attorney, client, matter or timekeeper. This is accomplished with Platinum’s ZOOM – Inquiry Analyzer.
Create and deliver bills to our clients in an electronic format.	An Electronic Billing Interface (EBI) which allows firms to create and deliver bills to clients via the Internet in the electronic format clients specify.
Save time and human error re-keying reports into Excel and/or Word.	Microsoft Excel and Microsoft Word interfacing, meaning all reports in the system can be downloaded in Excel and Word formats, totally eliminating the need to retype the information into spreadsheets.
Change WIP based on a new rate.	The ability to revalue time and change the rates retroactively.
Reverse the billing process when needed.	A way to easily move billed entries back to unbilled enabling additional edits and re-bills.
Streamline the management of cash and A/R activities within our firm.	An A/R Work Bench where all cash and A/R activities in firms are managed within one module.
Easily track billing and keep key firm decision makers apprised of the actual time to budgeted time.	The ability to track and bill matters using the uniform task billing codes. Also, the ability to establish budgets by phase or task and set event alerts that will notify the attorney when the firm is within a predefined percent of the budget.
